REPORT ON HTML WEBPAGE.

Hello! I am Tanweer Ahsan , student of Lovely Professional University. I was given to made a webpage which contain basic tags, CSS and Java Script. Above link mentioned is the link of webpage which is created by me and it contains all those tags which was required.

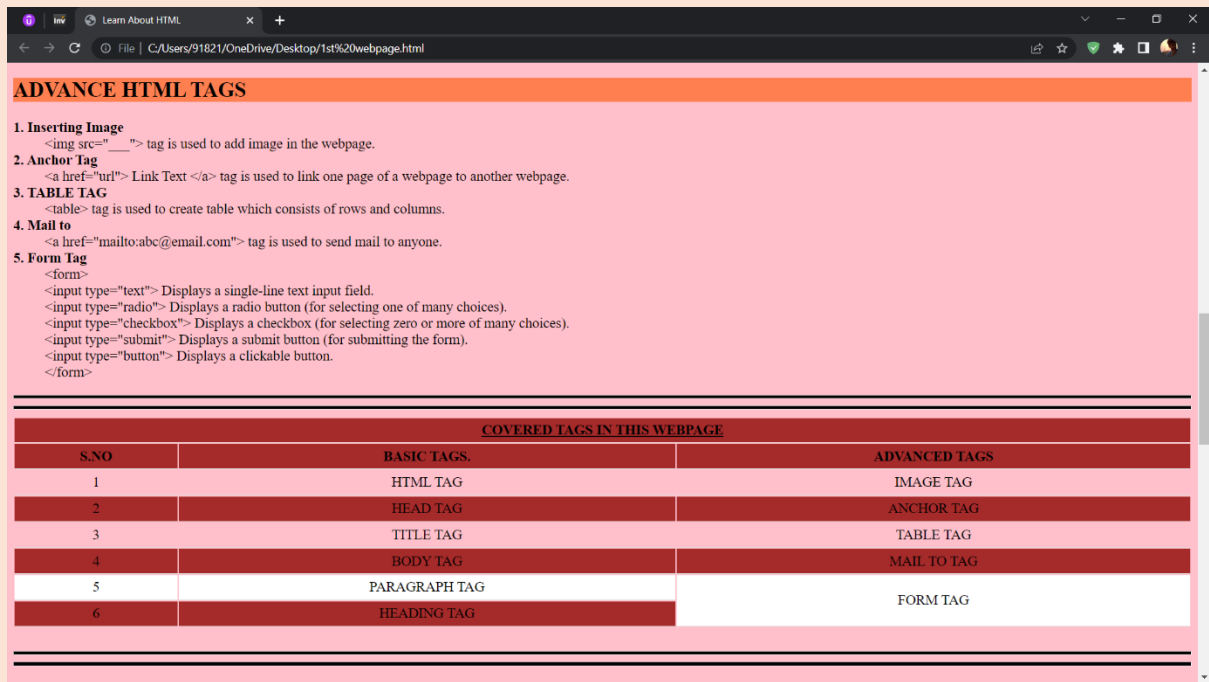

Above image is the 1st Screenshot of my webpage. In this Image you can see that I had used CSS along with many tags like quotation tag<q>, line break tag
, Image tag, table tag, abbreviation tag (in

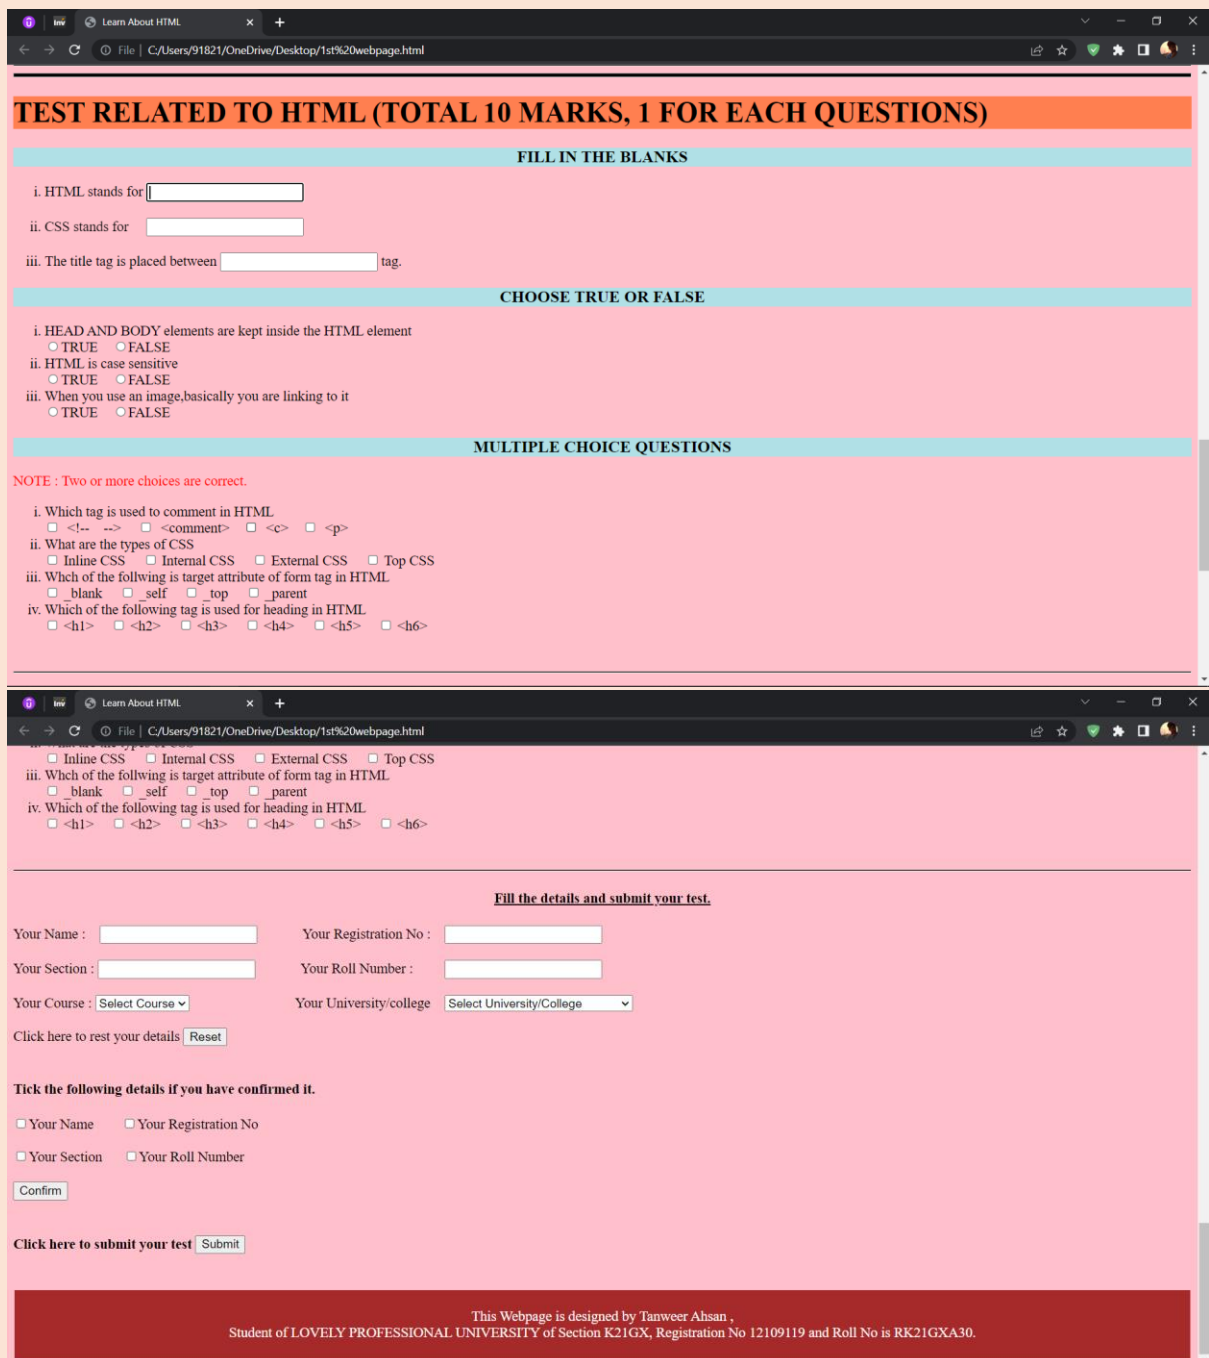

the line “BASIC HTML TAGS”), comment tag, heading tag, paragraph tag, bold tag, underlined tag.

Above image is the 2nd Screenshot of my webpage. In this image you can see that I had used list tag (both order and unordered list), CSS, heading tag, image tag, and hyperlink tag or anchor tag (in the last 2nd line), Also I had defined basic tag using of (<_>) tag by which we can display tag in webpage. Non breaking space tag () is also used.

Above image is the 3rd screenshot of my webpage. In this image you can see that I had used table tag, hr tag, and <_> tag, underline tag, heading tag, and defined some of advanced html tags.

Above image is the 4th and 5th screenshot of my webpage. In these images you can see that I had used heading tag(h1,h3,h4), underline tag, center tag, list tag, Non Breaking Space tag, paragraph tag, form tag(textfield tag, checkbox tag, radio button tag, select tag, reset tag, submit tag.) and Javascript tag(confirm tag) is also used in 5th Screenshot of these images.
